

## GENERAL DESCRIPTION

DAB Pumps are proud to officially launch the second phase of our brand new innovative booster product to the UK market, leading the way in electronic pump technology.

The E.SYTWIN is a completely new solution in cold water boosting for residential and light commercial applications.

Essentially a twin pump, water cooled booster with integrated high efficiency variable speed motor,

But the E.SYTWIN offers much more....

please see our commercial documentation for full pump details.

## DESIGN FEATURES

- Water cooled motor and sound dampening casing creating the quietest booster pump set available today
- Energy efficient variable speed motor operating from 0.25 KW to 1.5 KW
- Powerful performance flow up to 3.3 Litres/second and head up to 6 Bar
- Self priming down to 8 Metres
- Dry running protection
- Frost protection
- Energy monitoring facility
- Anti-vibration and ground mountings included
- Duty Assist or Duty Standby operation
- Variable positions for in-let and out-let pipework
- Integrated chambers with expansion vessels, tool kit and installer manual
- Wireless connectivity and modular design can expand the pump system up to a 4 pump booster set
- Optional E.SYTANK, integrated modular water storage tank system.
- Optional E.SYLINK, for remote wireless signal and external communication control.
